

MHS2710

Wireless Lift Scale

A cost-effective method for weighing patients with limited mobility, this compact lift scale fits neatly between the lift system and sling, without significantly affecting the height of the lift.

Featuring a rechargeable lithium battery pack and wireless data transmission for improved workflow, the MHS2710 is a completely self-contained lift scale designed to be operated quickly and easily.

Rechargeable lithium battery cartridge

High Capacity Rechargeable Battery
Rechargeable battery provides up to 160 hour operating time

Battery Quick-Swap
Quick-swap system allows battery to be swapped out, minimizing downtime

Wide Viewing Display
Featuring a new wide angle LCD indicator, measurement results can be viewed clearly from all angles

Wireless Transmission
With wireless module installed, results can be sent directly to EMR system to simplify workflow

Versatile Compatibility
Several joint attachments are available, making the Lift Scale compatible with a wide variety of systems

Compatible with different lift systems
