MS3830

Wheelchair & Stretcher Scale

The high-capacity MS3830 Wheelchair & Stretcher Scale is portable and easily transported on rolling castors, and can also be used as a bariatric scale, especially when used with optional handrails for added stability when used by patients who have difficulty standing independently. By deducting the weight of the wheelchair or stretcher using the scale's tare function, a patient's exact weight can be accurately measured.

The basic configuration includes the indicator. The indicator stand, thermal printer, and display handrail are optional.

Functions

- BMI
- Print
- Hold
- Tare
- Pre-Tare
- Backlight
- Portable Handle
- Wheel Castors
- Data Transfer

Carrying handle for easy transport

Castor wheels for portability

Quick lock and release for handrails
