

MS6000

Bed Scale

The Charder MS6000 Digital Bed Scale enables the simple and precise weighing of bedridden patients and is an indispensable part of dialysis and intensive care. Two portable beam scales are placed next to the castors of the bed, and the bed is rolled onto the scale safely.

In addition, the MS6000 can be left under the patient's bed to closely monitor the weight of a patient within a set range. If the patient's weight fluctuates outside of that range, an alarm will beep to alert medical staff.

Two sizes platform are available

Image contains optional indicator stand

Functions

- BMI
- Print
- Hold
- Tare
- Pre-Tare
- Bubble Level Indicator
- Weight Change Alarm
- Castor Wheels
- Portable Handle
- Wireless Data Transfer (optional)

Specifications

Capacity	600 kg
Graduation	0.1 kg<300kg>0.2 kg
Overall Dimensions	1256(W) x 366(D) x 61.5(H) mm
Device Weight	11.4 kg (per beam)
Power Supply	AA Batteries / Power Adapter Rechargeable Battery (optional)
Data Transfer	USB, Wireless (optional)
Optional Accessories	Indicator Stand, Thermal Printer

Color-coded connectors for easy installation

Push bed onto scale via foldable ramps

Thermal printer prints results record for patient reference

Built-in castor wheels

Handles for portability
