

Notice of transition of Notified Body on Medical Devices

from

DNV-GL Business Assurance NB0434

to

DNV GL Nemko Presafe NB2460

Date: 2nd of June, 2017

Dear Valued Customers,

A notice from Charder Notified Body DNV-GL that the Medical Device certification under NB0434 will be transferred to NB2460 due to business merge and re-arrangement.

Charder's official certificate NB2460 is now unified by DNV GL Nemko Presafe AS. Once DNV GL Nemko Presafe issued new certificate and re-certification, we will proceed further announcement and label CE2460 instead of CE0434 on our Medical Devices.

Charder's Medical Devices certificate with CE0434 label is failed on 17th of May, 2017. However, CE0434 label has a limited duration before 17th of Nov., 2017, this will allow you to have extra buffer time for importing.

We confirm that all the relevant documents, promotion leaflets, catalog and so on which bear with CE0434 will be replaced by CE2460 and you will receive our official confirmation of certificate update at the same time.

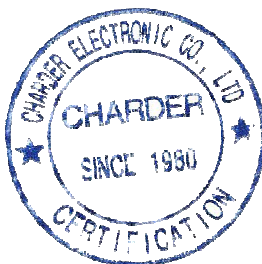

All Charder's Medical Devices which carry CE0434 can legally to sell without effect.

We are deeply sorry for this inevitable change that may cause any of inconvenience. Should you have any questions or information needed, please feel free to contact Charder sales representatives.

Thanks for your kind attention and sincerely wish your business grow steadily and successfully.

charder

Chris Cho,
Manager of Charder Medical Team
